INTERNATIONAL SEARCH REPORT

A. CLASSIFICATION OF SUBJECT MATTER Int.Cl ⁷ C12N15/09, C12N1/15, C12N9/26					
According to International Patent Classification (IPC) or to both national classification and IPC					
B. FIELDS					
Minimum documentation searched (classification system followed by classification symbols) Int.Cl ⁷ C12N15/09, C12N1/15, C12N9/26					
Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched					
WPI(ata base consulted during the international search (name DIALOG), BIOSIS (DIALOG), JSTplu ank/EMBL/DDBJ/GeneSeq, SwissPro	ıs(JOIS),	rch terms used)		
C. DOCUM	ENTS CONSIDERED TO BE RELEVANT				
Category*	Citation of document, with indication, where app		Relevant to claim No.		
X/Y	JP 9-009968 A (OZEKI CORP.), 14 January, 1997 (14.01.97), Full text (Family: none)		1,3,4,15-19/ 2,5-14		
Y	PETERSEN, KL. et al., Overexp disulfide is omerase in Asper Microbiol., (2000), Vol.41, N	gillus., Cull	2,5-14		
Y	TANI, S. et al., A novel nucl binds to a cis-acting element inducible expression of the A Taka-amylase A gene in A. nic Genet., (2000), Vol.263, No.2	:, SRE, required for Aspergillus oryzae Hulans., Mol Gen	2,5-14		
Further documents are listed in the continuation of Box C. See patent family annex.					
* Special categories of cited documents: "A" document defining the general state of the art which is not considered to be of particular relevance "E" earlier document but published on or after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention document of particular relevance; the claimed invention cannot considered novel or cannot be considered to involve an inventive step when the document of particular relevance; the claimed invention cannot considered to involve an inventive step when the document of particular relevance; the claimed invention cannot considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art document member of the same patent family Date of the actual completion of the international search 06 August, 2003 (06.08.03) "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention document of particular relevance; the claimed invention cannot considered novel or cannot be considered to involve an inventive step when the document of particular relevance; the claimed invention cannot considered to involve an inventive step when the document of particular relevance; the claimed invention considered to involve an inventive step when the document of particular relevance; the claimed document of particular relevance; the claimed invention cannot considered to involve an inventive step when the document of particular relevance; the claimed invention considered to involve an inventive step when the document of particular relevance; the claimed invention of the considered to involve an inventive step when the document of particular relevance; the claimed invention of the considered to involve an inventive step when the document of particular relevanc			the application but cited to lerlying the invention claimed invention cannot be stred to involve an inventive est claimed invention cannot be putent the document is an documents, such an skilled in the art family The report 2.08.03)
